

## Education

**University of Southern California**  
*B.S. Computer Science, Major GPA: 3.50*

*May 2014*

### Relevant Coursework

- Data Structures
- Principles of Software Development
- Operating Systems
- Programming and Multimedia on the Web
- Object-Oriented Programming
- Design and Analysis of Algorithms
- Design for User Experience
- Modern Technologies of Web Development

## Experience

### Clipmunk

*Co-founder and Web Designer*

*May 2013 – January 2014*

- Developed a web app that allows users to discover, collect, and share videos from any site
- Built on Bootstrap, jQuery, and Ruby on Rails, using GitHub
- Created all of the front-end interfaces and learned how to build a product from inception

### Handsome Holdings Group, LLC

*Web Designer and Developer*

*January 2013 – January 2014*

- Built an e-commerce site on Shopify for a small-scale, food-distribution business
- Worked on branding and initial web design for a travel-based referral site
- Designed a front-end site to showcase products for a lei and flower business

### Cahoots Connect, LLC

*Web Development Intern*

*January 2013 – May 2013*

- Helped develop their MVP, a student and alumni networking web app for small schools
- Built in HTML, CSS, JavaScript, PHP, and MySQL, using GitHub
- Learned how to adapt to existing code infrastructure and designed major user interfaces

## Academic Projects

### Tudu

*Lead Front-end Developer*

*Fall 2013 – Spring 2014*

- Architected a small-scale, front-end framework, designed to be modular and extensible
- Built on Bootstrap, jQuery, and Ruby on Rails, using QUnit and GitHub
- Learned about software life-cycles, Rails asset pipeline, and asset optimization best-practices

### Kitting Cell and Factory Project

*Back-end Developer*

*Fall 2012*

- Served on an 11 person team, developing a simulation in Java with 3 product cycles
- Developed the agent-based, back-end infrastructure and APIs to communicate with the GUI
- Learned about team-dynamics, Git version control, and code integration
